The Royal College General Practitioners has proposed that GP consultations be lengthened from 10 to 15 minutes by 2030, with flexibility for longer consultations for those who need them. 5. Community pharmacy guide for GPs

A number of PPGs have expressed concerns about the threat posed by the development of online pharmacies which deliver direct to patients. In many rural areas, community (local) pharmacies are a key resource for their communities. They deliver more than prescriptions. They can monitor and review what each patient's medication, and provide a source of advice and guidance on minor health matters. Use it or lose it!

The British Medical Association and PSNC, the body that represents community pharmacies, have published [a guide to community pharmacy for GPs and their practice teams](#). Full engagement of community pharmacy in the work of PCNs will be easier to achieve where local GPs and their teams have a clear understanding of how community pharmacies operate and the support they provide to patients and the public
